Search Notes

Dear Examiner Fadok:

Please find attached the results of your search for the above-referenced case. The search was conducted in the template files, plus two automotive/transportation databases.

I have listed references of *potential* interest in the first part of the search results. However, please be sure to scan through the entire report. There may be additional references that you might find useful.

If you have any questions about the search, or need a refocus, please do not hesitate to contact me.

Thank you for using the EIC, and we look forward to your next search!

Abstract: Realizing the **Web**'s full potential will require the development and support of agents that function as schedulers... ..minimal direction, can serve as an omnipresent staff of advisers, secretaries, brokers, and research assistants. **Electronic** commerce has brought this capability tantalizingly near. Organizations and individuals have connected an enormous variety of products and services to the **Internet**, making them accessible to other programs through simple communication protocols. Now the **AI** community must determine how it can build **intelligent agents** to exploit these services. One strategy would change the **Web** itself, making it accessible to existing **AI** modeling, and reasoning techniques. In this semantic **Web**, service and content providers would mark pages in accordance with standardized conventions designed to reduce ambiguity and make **automated** reasoning easier. The paper considers the development of a distributed intelligence and bringing agents to the **Web**. It **discusses** DAML-S which provides support for composite services, combinations of simpler services, or behaviors, and...

Abstract: ...in psychological experimental design and analysis, and show its application to complex agents. Finally, we make a specific proposal for facilitating the use of scientific method. We propose the creation of a **Web** site that functions as a repository for platforms suitable for statistical testing, for results determined...

Abstract: ...and specialized learning, These topics are already the subject of research in another area of **artificial intelligence**. The design of complete autonomous agents (CAA), such as mobile **robots** or **virtual** reality characters, has been dominated by modular architectures and context-driven action selection and learning... ...for ANN; and indirectly by using CAA research to better understand and model neuroscience. Specification: ...real-world funds to the seller. Once the real-world funds have been received the **transaction completes**.

As previously **discussed** there are several types of auctions for which the present system 200 may be used. For example, an English auction is the generally understood "normal" auction. In the "**online**" scenario the **seller** would post an offer for an amount of electronic funds at a specific opening bid...

KI A DRIVES DOWN PRICES BY SELLING CARS DIRECT

Times of London (TL) - Sunday, April 23, 2000

By: David Sumner Smith

Section: Features

Word Count: 414

"The future lies in providing new channels to market. We are **speaking** to three other car importers with market shares of 2% or less about providing similar direct **sales** services."

The motor industry will watch KiaDirect closely. Manufacturers and **dealers** are worried by **online** car **sales** initiatives such as Virgin Cars, Totalise and OneSwoop.com and are looking closely at direct **sales** as a means of reducing the costs of car sales through traditional dealerships.
